

ChopliTM

The leading home computer game in the U.S. has just become even better.

You man a helicopter rescue team. And your mission is to save your

helicopter down, rescue the hostages and fly them back to safety. All the while dodging and destroying dangerous enemy fire.

An action-packed helicopter game at its best.

USEFUL TIPS: CHOPLIFTER

Selection Screen:

In the title screen, move the control pad up, down, left, right, then press button #1 on the control pad. Repeat the same sequence for the next screen. You will see the number SELECT SCREEN 1. The numbers will rotate from 1 to 4. When the desired record number is displayed, press the start button to begin the game.

IN-Game Tips:

The last eight hostages can be located in the submarine. Push the periscope as it sticks out of the water. This will cause the submarine to come out of the water, when it does the hostages will appear on the bridge. Land on the bridge and rescue them.

You have a pleasant surprise feature if you destroy at least ten rockets. The movie characters JIMMYE and E.T. will show up to lend a helping hand. When they appear, the hostages will run faster to the chopper.
